Coupe évasée au bassin adaptée à la morphologie féminine.

Stabilizing support for the lumbar-sacral area for relieving pains or as preventing in people predisposed to back pathologies. Made with an antibacterial, fresh, thin polielastic fabric. H 21, 28, and 33 cm. Couleur chair.

This device is a stabilizing support for the lumbar-sacral area and has the function of relieving the pain in case of lumbago, sciatica, ischialgia and minor complaints, or preventing it in people predisposed to this kind of problems, as a result of either very demanding physical activities or an excessively sedentary lifestyle. This model have been shaped to suit the female body. It easily fits to each one, it's made of an elastic band to which self-modelling flexible stays have been added. The stabilizing effect of the elastic structure occurs when it is extended around the waist and the supplementary overhanging elastic bands, have been stretched and fastened. The effect is a reduction of the dorsal muscles tension and, consequently, of the pain.

Indications

- Lumbar/sacral pain;
- Whenever abdominal muscles require support;
- Post-op and/or preventative support;
- Lumbago;
- Sciatica.

CHARACTERISTICS

Height : 28 cm. Skin Colour.

BENEFITS

Very practical and functional, it assures an extreme easiness in wearing it on and a wide possibility of regulating the elastic tension. It's very thin and perfectly invisible under clothes.

SPECIF COMPONENTS

Made with the innovative fabric, NANOFEEEL : The **ANTIBACTERICAL** nano-technologies of the yarn guarantees **high** qualities made with of **COMFORT** and **CLEANLINESS**, preventing bacterial proliferation and bad smell development. They remain unchanged even after morethan 50 washes.

HOW TO WEAR IT

May be worn directly on the skin following instructions inside the box and for the choice of the size take pelvis circumference in cm. and refer to the table.
