Corset Spinova Osteo

Indications médicales

Spinova® Osteo Orthosis for actively straightening and stabilizing the spine
Spinova Osteo provides passive and active stabilization for the spine, offering relief for osteoporosis patients and preventing kyphosis. Thanks to the pelvis support, long aluminum reclinator and double crossed tensioning strap system it stabilizes the thoracic spine, corrects posture and activates the back muscles. The lightweight orthosis leaves the abdomen and chest free and it is unobtrusive under clothing.

Straightens the spine and stabilizes the pelvis Activates the back muscles Individually adjustable straightening Abdomen and breast area are free Very lightweight and unobtrusive design Spinova® Osteo Orthosis for actively straightening and stabilizing the spine
